In a nutshell

Through the arts, we will try to improve our students' academic performance as well as their possibility to participate in an Erasmus + project.

Focusing on STEAM methodology many subjects will be involved, working together around four important festivities in our countries.

Europeana Platform

Xàtiva 21 to 24 October 2019

Four days working together in a short-term staff joint training event!

The main learning outcome was four learning scenarios to be applied in both schools. Organized by IES Dr Lluís Simarro and delivered by European Schoolnet, eight teachers from both educational centres have implemented the scenarios in their classrooms.

For a more detailed overview of our work, please, do not hesitate to visit our website!

Las Fallas in Valencia

Xàtiva 13 to 17 January 2020

“It was a great week that was very well-organized and planned. Both - students and teachers- enjoyed it very much. Choreographing and performing an acro-gym show brought the students closer together and they formed a strong relationship in no time. They learned to work together in a team and to make the most of their strengths. By participating in a regular school day we learned a lot about the Spanish school system which was also interesting for us teachers as well as the students. The activities related to "Las Fallas" left us deeply impressed, especially the visit to the Fallas artist. The same can be said about our visit to Valencia and the guided tour which was very informative. Apart from our Erasmus + schedule we also enjoyed the extra activities in Xàtiva, for example trying the traditional Spanish food, picking oranges and participating in Spanish festivities (Canals) and watching a game of pilota valenciana.”

Kathrin Romaneessen (German teacher).
